Product Description

Eva Solo Globe Watering Can Grey

The Globe watering can has a completely unique round shape with an eye-catching handle. It can easily be filled through a hole in the side, either from a tap or from the garden hose. When watering, you can - without having to search for accessories - simply turn the specially designed spout to produce either a stream of water or a shower for your plants.

The can holds a generous 9 litres of water, which enables you to water more plants before refilling.

Perfect for the garden, living room, patio or balcony.

Designed in Denmark

- Holds 9 Litres
