Product Description

SCAN 83 White

The gentle self-closing soft-close door is only one of many unique details characterising the Scan 83. The curved glass door gives a perfect view of the fire, and the handle has been positioned so that it completes the simple design while remaining cool at the same time. Simple and stylish control of the rate of burn using the twin controls that stay cool during combustion.

A cool glass handle on the door completes the pure expression and separates the model from its competitors in the market.

- Woodburning - Flue size 150mm - A 8Kw output heats up to 320m3 - Gloss white finish - H1200 W460 D460 - 150mm flue diameter out top or rear - Made
